WORKING DATA FOR DEMAND ANALYSIS

2 U. S. Department of Agriculture
2 U. S. Agricultural Economics Division
2 U. S. Agricultural Marketing Service

Agriculture-Washington

Working Data for Demand Analysis

The attached tables contain a number of time series frequently used in statistical demand analysis.

Although these tables have been prepared by the Income and Demand Section of Farm Income Branch, much of the data originate in other Government agencies, including the Department of Commerce, Bureau of Labor Statistics, and the Bureau of the Census. Some of these data have not been previously published and some of the current data are preliminary. The material as a whole is not for general publication and the exact status of each series can be ascertained from the appended footnotes.

These tables are revised once a year, usually in October, by the Income and Demand Section of the Farm Income Branch, Extension 4740. Since some of these data are regularly compiled by other agencies, it is suggested that current revisions of basic data, particularly the estimates of total income and expenditures of the Department of Commerce and the estimates of prices by the Bureau of Labor Statistics can best be obtained directly in publications from those agencies.

Table 1.--Population, United States 1914-55

Year	Total popula- tion January 1 <u>1</u> /	Farm popula- tion April 1 <u>2</u> /	Total popula- tion July 1 <u>3</u> /
	<u>Thousands</u>	<u>Thousands</u>	<u>Millions</u>
1914	98,248	32,320	99.1
1915	99,891	32,440	100.5
1916	101,314	32,530	102.0

For footnotes, refer to last sheet of this series.

FOOTNOTES

1/ Total population of continental United States as of January 1, including armed forces overseas. (Bureau of the Census.)

2/ Farm population of the United States as of April 1 as estimated jointly by AMS and the Bureau of the Census.

3/ Total population of continental United States as of July 1, including armed forces overseas.

4/ Preliminary estimates; not for publication.

5/ Revised estimates for 1914-28 by AMS.

6/ Bureau of Labor Statistics for 1914 to date.

7/ This series on national income is the sum of AMS estimates of agricultural and nonagricultural income, which was constructed to meet legislative specifications for measuring income parity for agriculture. Because of the requirement of strict comparability between estimates of farm and nonfarm income and the differences in purpose for which the AMS series and Commerce series are constructed, the series differ conceptually in several respects and are not comparable.

8/ Adjusted for under-enumeration. Includes all members of armed forces, 1914-40; beginning 1941 includes only those eating out of civilian supplies.

9/ Derived from civilian per capita consumption index.

10/ Total population of continental United States as of July 1, including armed forces overseas. Adjusted for under-enumeration.

11/ Currently published by Department of Commerce as a component of the gross national product.
